

## Executive Performance Summary

### The Big Picture

- Total Revenue: ₱27.11M (with +17.88% year-over-year growth from 2024 to 2025).
- Volume Sold: 255,031 units.
- Gross Margin: 31.43%.

### Fast Answers to the 7 Core Questions

1. Network Health: Strong. Stable 31.43% profit margin with steady sales growth.
2. Top Region: Luzon drives 50% of sales (₱13.57M). *Note: Visayas is underreported by ₱2.09M because Store S014 (Iloilo) was mislabeled with "no region".*
3. Best Store Format: Standard stores (₱12.60M) bring in ₱2.74M more than expensive Flagship setups.
4. Products: Tobacco & Liquor brings in the most cash (₱6.40M), but Beverages yields the highest profit margin (36.10%).
5. Growth Trend: Upward. Sales spiked dramatically in Q4, peaking in December at over ₱2.01M.
6. Loyalty Impact: Tracked members drive 70% of sales (led by Blue tier at 54%), but anonymous walk-ins still account for a massive ₱8.24M (30.4%) gap.
7. System Issues: Dirty data at checkout. Identical payments are split up by typos like "G-Cash" vs. "Gcash" and trailing spaces ("Cash" vs. "Cash ").

### 3 Immediate Management Actions

- Boost Profits: Place high-margin Beverages (36.10%) right next to high-volume Tobacco counters (₱6.40M) and run bundle promos to increase the average receipt total.
- Save Capital: Freeze expensive flagship expansions. Focus your budget on Standard-tier stores, which are proven to generate higher returns with less overhead.
- Fix Data & Capture Walk-ins: Lock down the checkout software to eliminate manual typing errors (standardizing "Gcash"). Simultaneously, offer checkout incentives to convert the ₱8.24M in anonymous walk-ins into trackable Blue-tier loyalty profiles.
